NOTES:

- ¹DPS Staff needs to work with utilities to develop a Program ID naming convention. However, a Program ID number is not
- ²There is not currently a consistent list of program types but individual categories for common use by administrators could
- ³First-year savings are defined as the annual savings expected from a given measure in the first year after installation. The
- ⁴annual savings are sometimes the result of annualizing estimated savings that are based on data that cover less than one
- ⁵Regardless of the month in which a measure is installed within a given calendar year, the program is credited with the
- ⁶associated savings for the entire year
- ⁷Program Administrators should make best estimate of the annual goal even though the goal might in some cases cover two
- ⁸Peak is defined uniquely for each utility.
- ⁹The lifecycle savings are tracked beginning in the *year* in which a given measure was installed. Over the period 2008-
- ¹⁰Committed savings are defined as those for which funds have been encumbered by not yet spent. When the funds are
- ¹¹spent (i.e. a rebate check has been sent to the participant on a specific date) the savings are then considered "acquired."
- ¹²These are the budget categories to be used by companies when submitting the required energy efficiency program
- ¹³An application is processed once the PA has reviewed the application and made a decision whether to approve the
- ¹⁴incentive payment to the customer. Once this decision has been made to pay the incentive to the customer, these funds and
- ¹⁵the application is approved once the decision has been made to pay the incentive to the customer. Note that these funds and their associated energy and demand impacts become "Committed" once this decision is made. Also note that for
