

# 2021 Rebate Programs

## Non-Residential Conservation Incentive Program

The National Fuel Fueling Tomorrow Today Program offers WNY non-residential customers several money-saving rebates for replacing specified appliances with new, energy-efficient models. There are two ways to save:

- Fixed (Pre-Qualified) Rebate** Available on pre-qualified equipment. (See table below.)
- Customized (Performance-Based) Rebate** Determined on a case-by-case basis, based on the results of an energy-use analysis. Customized rebates are determined by multiplying the annual energy savings in Mcf by \$15. This may result in a larger rebate compared with the fixed rebate.
