

Non-Residential Conservation Incentive Program

The National Fuel Conservation Incentive Program offers WNY non-residential customers several money-saving rebates for replacing specified appliances with new, energy-efficient models.

Two Ways to Save with National Fuel:

1. **Fixed (Pre-Qualified) Rebate** Available on pre-qualified equipment. (See table below.)
2. **Customized (Performance-Based) Rebate** Determined on a case-by-case basis, based on the results of an energy-use analysis. Customized rebates are determined by multiplying the annual energy savings in Mcf by \$15. This may result in a larger rebate compared with the fixed rebate.

Free Technical Assistance.

As a courtesy to both our customers and contractors, National Fuel has partnered with C.J. Brown Energy to provide free technical assistance with the application process. Contact C.J. Brown Energy at 1-844-365-3493 or email NFRbateHelp@cjbrownenergy.com.
